SESSION: Advanced Forensic GPR: the use of the GPR in a legal context

Session Conveners: Pier Matteo Barone¹,², Alastair Ruffell³, and Coen Nienabar⁴

¹,² American University of Rome, IT; Forensic Geoscience Italy-Geoscienze Forensi Italia®, IT (p.barone@aur.edu)
³ Queen’s University, Belfast, UK (a.ruffell@qub.ac.uk)
⁴ Netherlands Forensic Institute, NL (c.nienaber@nfi.minvenj.nl)

Nowadays, the geophysical survey with Ground Penetrating Radar (GPR) may represent the most effective and non-destructive technique for locating forensic targets, helping law enforcement to better perform crime scene investigations. Progressively, GPR has acquired credibility in the field of real-time shallow subsurface investigations within a legal framework in several countries, not only to detect clandestine burials, bunkers, and caches of drugs or weapons, but also to help during disaster victim investigations and to examine environmental and heritage crimes.

For the first time, during the 10th edition of the International Workshop on Advanced Ground Penetrating Radar (IWAGPR 2019), this session will give the possibility to all professionals to present their research and achievements on forensic GPR.

Paper submission

Instructions for Authors and a paper submission form are available here:
http://gpradar.eu/iwagpr2019/authors.html

To optimize the management of the review process and organization of the session, please inform the session conveners when you submit your paper!

Important dates

12 March 2019 (13:00 CET) – Manuscript submission deadline
16 April 2019 at the latest – Acceptance Notification, Revision Request, or Reject Notification
21 May 2019 – Deadline for the submission of final papers
